

Release Bulletin for www.handyhardware.com

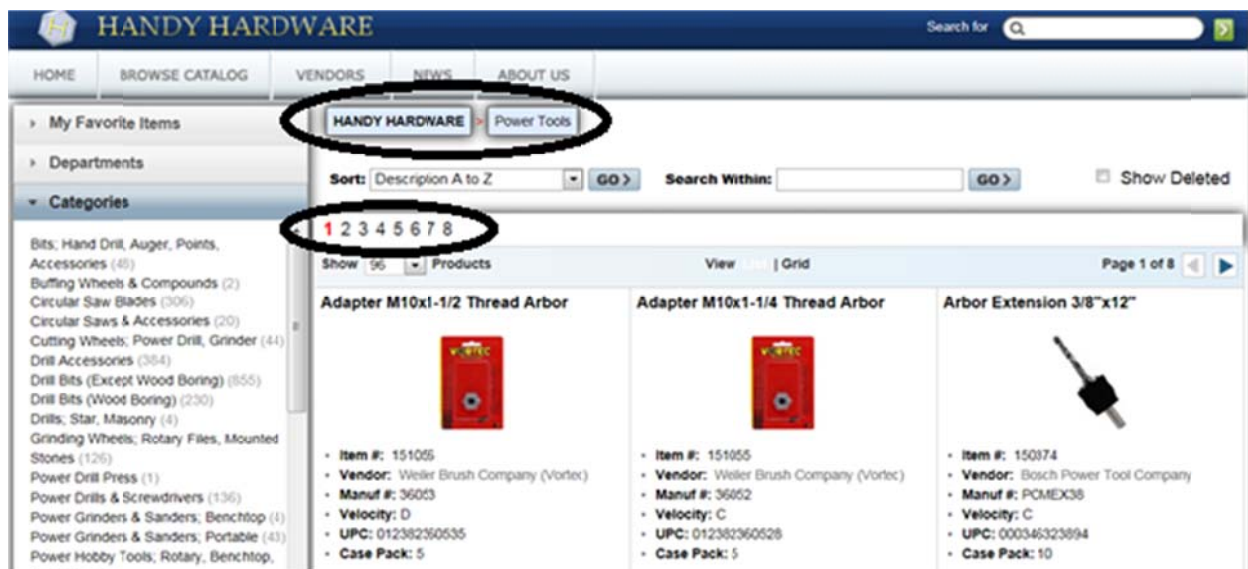

Dated 02.01.2012

➤ Search ease of use, consistency of results, and performance has been improved::

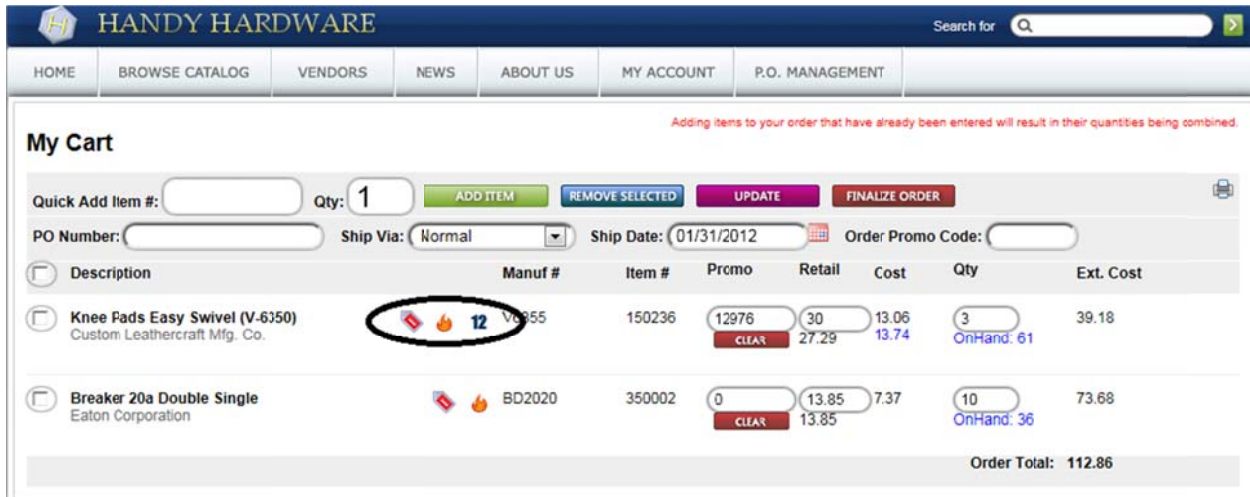

- Department, Category, Subcategory, and Vendor searches have been standardized and performance optimized.
 - All search related item data is being pulled directly from S2K (master repository and single point for maintenance).
 - Duplicates and search hierarchy issues have been resolved.
 - Vendor Search issues have been resolved.
- Former "Search by" function has been replaced by a Google or Amazon-like full text search function. This "Search for" function (top right corner of the website) is a global search levied against all item description variable from S2K.

➤ Breadcrumbs have been modified and page numbers have been added to make navigation more efficient. Users can back out of their search with a visible indicator. Users can also access pages directly without clicking on the page forward or back arrows. Also, the menu color scheme has changed from blue to white and is much faster than the previous website menu.

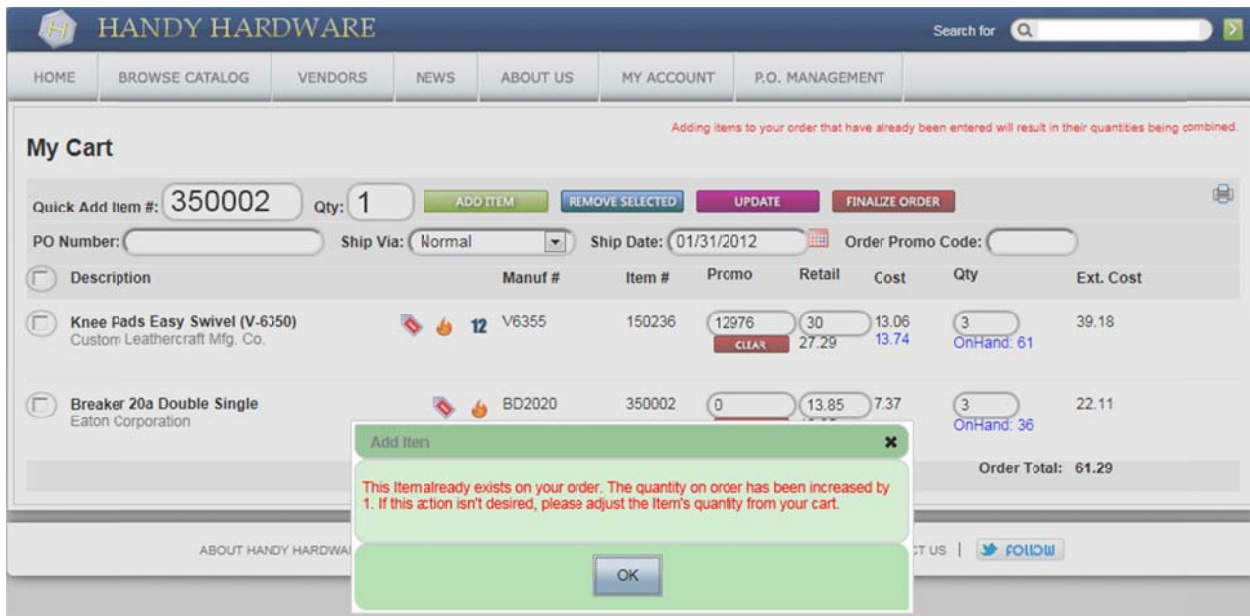

- Shopping Cart has been updated to show the price change, promotion, and a dealer specific “Ordered in the last 12 months” icon.

- Other cart changes:
 - If a monthly promotion item is added to the cart the “Promo” number will default and will not be cleared when an item is duplicated in the cart. Also, if a promo is selected after the item is added to the cart it will remain and not be cleared if the item is duplicated.
 - Adding or clearing a promo number now recalculates totals and refreshes the page.
 - Hovering over an item’s icons will show the details.

- Adding duplicate items via Quick Order or directly to the shopping cart via “Search Catalog” and “Search for” will increase the order quantity and warn users instead of overwriting the existing item quantity with the latest quantity entered:

- Note this implementation is limited to the standard (non-PO module) shopping cart. We will replicate this in the PO module after we certify these changes in production.
- In the next release we will provide the user with the ability to accept or reject the addition of the duplicate item.

- The Dealer Discrepancy Form has been updated with a P-License column:

DEALER DISCREPANCY FORM (Multi-Plan)

Handy Hardware Wholesale Inc. • 8300 Tewanin Dr. • Houston, Tx. 77061 • Fax 713-388-3675 / 800-364-3835
